

SAFe® Scrum master with SSM Certification

Applying the Scrum Master role within a SAFe® enterprise.

Training Overview

In this two-day course, you will gain an understanding of the role of a Scrum Master in a SAFe® enterprise. Unlike traditional Scrum Master trainings that focus on the fundamentals of team-level Scrum, the SAFe® Scrum Master training explores the role of Scrum in the context of the entire enterprise. It prepares you to successfully plan and execute the Programme Increment (PI), the primary enabler of alignment throughout all levels of a SAFe® organisation.

Training Objectives

To perform the role of a SAFe® Scrum Master, attendees should be able to:

- Describe Scrum in a SAFe® enterprise
- Facilitate Scrum events
- Facilitate effective iteration execution
- Support effective Programme Increment execution
- Support relentless improvement
- Coach Agile teams for maximum business results
- Support DevOps implementation

Target Audience

This training is intended for people new to the role of a Scrum Master or people who would like to understand the role better and how it fits in a SAFe® enterprise. Attendees typically include new or existing Scrum Masters, Team Leads and Release Train Engineers.

Prerequisites

All are welcome to attend the training, regardless of experience. However, the following prerequisites are highly recommended:

- Familiarity with Agile concepts and principles
- Awareness of Scrum, Kanban, and eXtreme Programming (XP)
- Working knowledge of software and hardware development processes

WHY ACADEMY!

Training Content

1. Identify the key elements of Scrum
2. Explore Scrum in the context of a SAFe® enterprise
3. Describe the roles and responsibilities of the Scrum Master
4. Identify the characteristics of an effective Scrum Master
5. Experience PI planning and explore how to facilitate this event
6. Ways to present stories and prototyping
7. Experience a complete iteration
8. Explore how to facilitate iteration planning, backlog refinement, team and system demos and the iteration retrospective
9. Identify ways to track iteration progress and foster collaboration and synchronisation between the teams in the programme
10. Identify the characteristics of a servant leader
11. Experience coaching with powerful questions
12. Identify ways to facilitate better meetings, foster team member collaboration and manage conflicts
