

Critical Thinking

Discover how critical thinking can help improve decision making and increase the potential for success of innovation processes. This training explores the nuances of logic, behaviour and belief and provides practical guidelines for their application to common daily scenarios.

Training Overview

Critical thinking is a key skill to navigate the contemporary work environment where there is a need for collaboration, creativity and the ability to handle complexity. Critical thinking skills help in making informed decisions and uncovering creative solutions to tricky problems. This training teaches critical thinking to both enhance work processes and improve social interactions.

Training Objectives

This training takes a pragmatic approach to teaching critical thinking by diving into the key concepts and applying structured methods to all types of problems and opportunities, regardless of size and domain.

At the end of the training, trainees have a clear understanding about the following:

- Purpose and method of Critical Thinking
- Drivers behind thought and decision making
- Basic theory of how the brain and the body affect decision making
- Different forms of argument and reasoning
- Applying Critical Thinking and reasoning to various problem solving scenarios - group and individual
